### Microsoft Visual Basic 6.0 Service Pack 6 Cumulative Update

A security issue has been identified that could allow an attacker to compromise your Windows-based system running Microsoft Visual Basic 6.0 Service Pack 6. This cumulative update rollup includes security update 926857 and updated versions of many other Microsoft ActiveX controls that make up the Visual Basic 6.0 Runtime Extended Files. Do I really need this cumulative update rollup? Yes. This cumulative update rollup contains the previously mentioned security fixes and several other stability fixes and performance fixes for the ActiveX controls that are included in the Visual Basic 6.0 Runtime Extended Files. Additionally, the ActiveX controls that are included in this cumulative update rollup will be the baseline for any future updates for these ActiveX controls. This includes security updates and hotfixes for these ActiveX controls. Therefore, we strongly recommend that you install this cumulative update rollup to have the latest supported baseline for these ActiveX controls.
